

Nimm Adjust AFO

Nimm Adjust is neat and handy, providing great support that helps users with drop foot return to an active life. It lifts the foot immediately after toe-off, ensuring users can avoid obstacles such as carpet edges, thresholds, or even minor surface irregularities.

Neat and handy aid for drop foot patients

Crafted from genuine leather: soft on the skin and becoming more comfortable with daily use. Additional pads at the tibia enhance the orthosis' comfort.

Easy to Attach: The brace wraps securely around the ankle with Velcro straps. Its universal construction allows users to choose their preferred closure direction.

Adjustable Lift: The lift intensity can be adjusted in two ways: by repositioning the Velcro pad or relocating the hooks in the shoe.

Automatic Foot Lift: When walking, the elastic band automatically lifts the foot. Nimm Adjust is a discreet aid suitable for both children and adults.

NIMM ADJUST

- Neat and handy aid for drop foot users
- Lifts the foot immediately after toe-off, preventing the user from worrying about tripping
- Made of leather that becomes softer with daily use
- Extra padding at tibia makes Nimm even more comfortable
- Universal design allows the user to choose whether to fasten the Velcro straps inward or outward
- Nimm Adjust is suitable for both children and adults
