

Nimm Regular AFO

Nimm Regular is a lightweight and convenient orthotic aid that helps drop foot users regain an active life. It lifts the foot immediately after toe-off, preventing the user from tripping over obstacles such as carpet edges, thresholds, or even the smallest uneven surfaces.

Neat and Convenient Aid for Drop Foot Patients

Made from genuine leather: Soft against the skin and becomes more comfortable with daily use. Additional padding at the front of tibia enhances comfort.

Easy to fasten: Secured around the ankle with Velcro straps. The universal design allows users to choose whether to fasten the straps inward or outward.

Adjustable lift: A D-ring on the front of Nimm Regular secures the elastic band, which is then attached to hooks mounted on the shoe's lacing loops. The lift can be adjusted by twisting the elastic band or moving the hooks on the shoe.

Automatic foot lift: As the user walks, the elastic band automatically lifts the foot.

Discreet design: Suitable for both children and adults.

NIMM REGULAR

- Lifts the foot immediately after toe-off, preventing the user from worrying about tripping
- Made of leather that becomes softer with daily use
- Extra padding at tibia makes Nimm even more comfortable
- Universal design allows the user to choose whether to fasten the Velcro straps inward or outward
- Nimm Regular is suitable for both children and adults
